

War with aliens!

BOOM! BOOM! BOOM! Lightning crashed in the middle of town. Lucy (10) and John (Lucy's dad) were outside looking at the lightning storm that was near them, across the long, wide, dark blue, straight river. The lightning came out of this black hole in the sky. "Lightning, can never strike in the same place" shouted John, while the lightning struck in the same place in town.

John went to see where the lightning struck. Suddenly, the cars stopped working. As soon as he got there the Earth started shaking. Then the church wall cracked open. Without a sound a machine which was about 40 double decker buses tall came up out of the ground.
